

METHOD, SYSTEM AND STORAGE MEDIUM FOR DYNAMICALLY SELECTING
A PAGE MANGEMENT POLICY FOR A MEMORY CONTROLLER

ABSTRACT OF THE DISCLOSURE

5 A method for operating a memory controller including
receiving a current memory access request from an agent. A
page management policy associated with the agent is
determined in response to receiving the request. The
memory controller is set to the page management policy
associated with the agent and the current memory access
10 request is executed on the memory controller. The results
of the executing are transmitted to the agent.
